

### Product Liability 12.07.2007

Our products are covered against damage via our Product Liability Insurance.

This means, if damage on a vehicle is caused by a Squarell device, the costs for repair or/and replacement and injury are covered by this insurance.

Damage is covered upto 2.500.000 Euro per claim. The product liability is applicable on all our products, including;

6603-21 iCommdiode	6660-22 Digital Input device
6602-21 iCommunicate	6670-22 Volt m/A Sensor device
6626-21 CANdiode (FMS interface)	6640-22 Resistance Sensor device
6600-32 Datalogger 32mb	6680-26 6 Power Output device
6627-27 J1708 to CAN	6650-22 Strain Gauge Sensor device
6629-21 OBD to CAN	6625-21 CAN to CAN device
6622-22 Tacho to CAN	6617-21 GPS to CAN device
6623-22 Tach to CANdiode	

There must be indisputable proof that the damage or injury is caused by the Squarell unit. An expertise and contra expertise must prove this.

The Squarell unit must be installed correctly, using the original Squarell CANbus and Power cables, according to the Squarell installation instructions.

This Product Liability Insurance is applicable to all Squarell products used in the (automotive) environment they are designed for.

All Squarell products apply to the E4 standard. Eventual claims will be handled under the Dutch law.

We also proclaim that until the date of this document, never had to deal with any product lawsuit or damage claim so far.

This document is a summary of and restrictive to the Insurance company's original Squarell product liability document.
